Summary

Front-End Developer specializing in React, Next.js, TypeScript, and Tailwind CSS, with full-stack experience using Node.js and MongoDB. Building responsive, user-focused web applications that solve real-world problems.

Technologies

Core

JavaScript (ES6+), TypeScript, HTML, CSS

React

React, React Router, Next.js, SPA architecture

Styling & UI

Tailwind CSS, Sass, shadcn/ui, Mantine, Framer Motion

Tooling

Git, GitHub, Vercel, Sentry

Backend & Devops

Also Comfortable building REST APIs with Node.js, Express, MongoDB, and deploying apps using Nginx, PM2, SSH, and VPS

Projects

Bestcenter

Production e-commerce platform for a laptop retailer in Erbil, live and in daily commercial use. Built the frontend in Next.js and TypeScript with Tailwind CSS and shadcn/ui, and the API in Express and MongoDB.

- Full internationalization across three locales, including a right-to-left Kurdish layout
- Product catalog with category and brand filtering, real-time cart, bookmarks, recently-viewed items, and a pre-order flow
- Authentication including Google OAuth
- Sentry error monitoring running in production
- SEO and Open Graph metadata configured for search and social sharing
- Responsive across mobile, tablet and desktop

SpendSentry

Personal finance application for tracking income, expenses and balances.

- Next.js with API routes, Tailwind CSS and shadcn/ui
- Per-category budgets with threshold alerts, spending analytics and charts, recurring transactions, and PDF report export
- Authenticated accounts with per-user data isolation

MergeIt tool

Fully redesigning my previous project [MergeIt](#), a subtitle management tool originally developed as a React single-page application using React Router and Mantine UI.

- Fully redesigned and rebuilt the **UI/UX** for a cleaner, more intuitive experience with a new [domain](#)
- Added **ASS subtitle support** alongside SRT, with format-perfect output and fast client-side processing
- Rebuilt with **Next.js, TypeScript, Tailwind CSS, and shadcn And framer motion also deployed on Vercel.**

Movie Search Engine

React application for browsing and discovering films against a third-party movie API, with search, filtering and detail views.

Experience

Freelance

Front-end developer

Building responsive web applications with React, Next.js and TypeScript, with a strong focus on UI and user experience. I also work with Node.js, Express and MongoDB for backend development, and handle production deployment. Remote June 2025 -present

kurdsat & Ace tv & local websites

Subtitling translator

Translated and localized English-language content into Kurdish for television broadcasts, including documentaries, and entertainment media. Produced accurate, culturally appropriate subtitles while working under tight broadcast deadlines and collaborating with editors and translation teams to ensure consistency and quality. Remote 2021-2025

Education

salahaddin university college of education

Special Education

Transitioned to software development through self-study in 2024 Nov 2019 - June 2023
